

# Contents

<b>Preface</b> .....	iii
<b>1. Executive Summary</b> .....	1
<b>2. Introduction</b> .....	8
<b>3. Biophysical</b> .....	11
<b>3.1 Energy Deposition and Its Relevance to Questions of Low-Dose Response</b> .....	11
<b>3.1.1 Track Structure</b> .....	11
<b>3.1.2 Quantitative Characterization of Energy Deposition in Small Sites</b> .....	14
<b>3.1.3 Definition of Low Dose, Corresponding to an Average of One Energy Deposition Event per Target</b> .....	16
<b>3.2 Implications of Energy-Deposition Patterns for Independent Cellular Effects at Low Doses</b> .....	18
<b>3.3 Implications of Energy-Deposition Patterns for Carcinogenic Effects of Radiation</b> .....	20
<b>3.3.1 Evidence Regarding the Clonality of Tumors</b> ..	21
<b>3.3.2 Relationship Between Initially-Damaged Cells and Tumorigenic Cells</b> .....	22
<b>3.4 Conclusions</b> .....	23
<b>3.5 Research Needs</b> .....	24
<b>4. Deoxyribonucleic Acid Repair and Processing after Low Doses and Low-Dose Rates of Ionizing Radiation</b> .....	25
<b>4.1 Ionizing Radiation-Induced Deoxyribonucleic Acid Lesions and Their Repair</b> .....	25
<b>4.1.1 Single-Strand Breaks (Including Deoxyribose Damage)</b> .....	25
<b>4.1.2 Base Damage and Loss</b> .....	27
<b>4.1.3 Deoxyribonucleic Acid-Protein Cross-Links</b> .....	28
<b>4.1.4 Double-Strand Breaks</b> .....	28
<b>4.1.5 Multiply-Damaged Sites</b> .....	29
<b>4.1.6 Mismatch Repair</b> .....	30
<b>4.1.7 Effects of Linear-Energy Transfer</b> .....	30
<b>4.1.8 Spontaneous Deoxyribonucleic Acid Damage</b> ..	30
<b>4.2 Cell-Cycle Checkpoints</b> .....	31
<b>4.3 Programmed Cell Death (Apoptosis)</b> .....	32

4.4	Impact of Cell-Cycle Checkpoints and Apoptosis on the Dose Response for Deoxyribonucleic Acid Repair at Low-Dose Rates .....	32
4.5	The Adaptive Response .....	33
4.6	Summary .....	34
4.7	Research Needs .....	34
<b>5.</b>	<b>Mutagenesis</b> .....	<b>36</b>
5.1	Introduction .....	36
5.2	Potential Mechanisms of Mutagenesis .....	36
5.2.1	Replication Errors .....	36
5.2.2	Mutations Arising During Repair .....	37
5.3	Dose-Response Studies with Low Linear-Energy Transfer Radiation .....	37
5.3.1	Human <i>in Vivo</i> .....	37
5.3.2	Animal <i>in Vivo</i> .....	39
5.3.3	Mammalian Cells <i>in Vitro</i> .....	41
5.3.3.1	Assays at the Hypoxanthine Phosphoribosyl Transferase Locus .....	41
5.3.3.2	Assays at Other Genetic Loci .....	42
5.3.3.3	Dose-Rate Effects .....	44
5.3.3.4	Effect of Genetic Background .....	45
5.3.3.5	Inducible Systems .....	45
5.3.3.5.1	Genomic instability .....	45
5.3.3.5.2	Adaptive response .....	46
5.4	Dose-Response Studies with High Linear-Energy Transfer Radiation .....	46
5.5	Summary .....	48
5.6	Research Needs .....	49
<b>6.</b>	<b>Chromosome Aberrations Induced by Low Doses and Low-Dose Rates of Ionizing Radiation</b> .....	<b>50</b>
6.1	Misrepair, Misreplication, and Chromosome Aberration Formation .....	50
6.1.1	Chromosome-Type Aberrations .....	51
6.1.2	Chromatid-Type Aberrations .....	51
6.1.3	Mechanisms of Formation of Chromosome Aberrations .....	52
6.1.3.1	Low Linear-Energy Transfer Radiations .....	53
6.1.3.2	High Linear-Energy Transfer Radiations .....	55
6.1.4	Dose-Response Curves: Acute and Chronic Exposures .....	55

6.1.4.1	Low Linear-Energy Transfer Radiations .....	55
6.1.4.2	High Linear-Energy Transfer Radiations .....	56
6.2	Distribution of Aberrations Within and Among Cells .....	56
6.2.1	Intercellular Distributions of Chromosome Aberrations .....	57
6.2.2	Inter- and Intrachromosomal Distribution of Chromosome Aberrations .....	57
6.3	Uncertainties in Shapes of Dose-Response Curves at Low Doses .....	59
6.3.1	Nonlinear and Threshold Responses .....	59
6.3.2	Effect of Adaptive Response .....	61
6.3.3	Efficiency of Deoxyribonucleic Acid Repair .....	62
6.3.4	Inducibility of Deoxyribonucleic Acid Repair and Cell-Cycle Checkpoints .....	62
6.3.5	Genomic Instability .....	63
6.4	Association Between Chromosomal Changes and Cancer .....	71
6.5	Biological Dosimetry for Chromosome Aberrations ...	74
6.5.1	Acute Exposures .....	74
6.5.2	Chronic Exposures .....	76
6.5.3	Evidence for Threshold and/or Linearity in Dose Response .....	77
6.5.4	Implications for Dose Response for Carcinogenic Effects .....	77
6.6	Summary and Conclusions .....	78
6.7	Research Needs .....	79
<b>7.</b>	<b>Oncogenic Transformation <i>in Vitro</i> and Genomic Instability .....</b>	<b>81</b>
7.1	Dose-Response Relationships .....	81
7.2	Shape of the Dose-Response Relationship for Oncogenic Transformation .....	83
7.3	The Bystander Effect .....	89
7.4	Transformation by High Linear-Energy Transfer Radiations .....	91
7.5	The Dose-Rate Effect .....	91
7.6	Modulation .....	92
7.7	Genomic Instability .....	94
7.8	Adaptive Response .....	95
7.9	Summary .....	96
7.10	Research Needs .....	97

<b>8. Carcinogenic Effects in Laboratory Animals</b> .....	99
<b>8.1</b> Introduction .....	99
<b>8.2</b> Characteristics and Multistage Nature of Carcinogenesis in Model Systems .....	99
<b>8.3</b> Dose-Response Relationships (Dose, Dose Rate, Linear-Energy Transfer) as Influenced by Homeostatic and Other Modifying Factors .....	101
<b>8.3.1</b> Background .....	101
<b>8.3.2</b> Leukemia .....	102
<b>8.3.2.1</b> Thymic Lymphoma .....	102
<b>8.3.2.2</b> Myeloid Leukemia .....	103
<b>8.3.3</b> Osteosarcoma .....	106
<b>8.3.4</b> Mammary Gland Tumors .....	108
<b>8.3.5</b> Thyroid Neoplasia .....	114
<b>8.3.6</b> Lung Tumors .....	116
<b>8.3.7</b> Renal Neoplasms .....	116
<b>8.3.8</b> Skin Tumors .....	118
<b>8.3.9</b> Mouse Harderian Gland Tumors .....	122
<b>8.4</b> Life Shortening .....	123
<b>8.5</b> Summary .....	125
<b>8.6</b> Research Needs .....	130
<b>9. Carcinogenic Effects in Human Populations— Epidemiological Data</b> .....	131
<b>9.1</b> Considerations in Using Epidemiologic Data for Low-Dose Risk Assessment .....	131
<b>9.2</b> Types of Epidemiological Studies and Their Strengths and Weaknesses .....	133
<b>9.2.1</b> Cluster Studies .....	133
<b>9.2.2</b> Ecologic Studies (Studies of Aggregated Epidemiologic Data) .....	134
<b>9.2.3</b> Case-Control Studies .....	136
<b>9.2.4</b> Cohort Studies .....	137
<b>9.3</b> Examination of Linearity of Dose Responses and Low-Dose Risks in Epidemiologic Data .....	138
<b>9.3.1</b> Total Solid Cancers .....	138
<b>9.3.2</b> Leukemia .....	146
<b>9.3.3</b> Thyroid Cancer .....	155
<b>9.3.4</b> Breast Cancer .....	162
<b>9.3.5</b> Lung Cancer .....	166
<b>9.3.5.1</b> Low Linear-Energy Transfer Irradiation .....	166

<b>9.3.5.2</b> High Linear-Energy Transfer Irradiation .....	171
<b>9.3.6</b> <i>In Utero</i> Irradiation .....	178
<b>9.3.7</b> Impact of Modifying Factors on the Shape of the Dose-Response Curve .....	191
<b>9.3.7.1</b> Host Susceptibility and Radiation Sensitivity to Cancer: Theory .....	191
<b>9.3.7.2</b> Host Susceptibility and Radiation Sensitivity to Cancer: Current Information .....	192
<b>9.3.7.3</b> Interactions between Radiation and Other Cancer Risk Factors or Exposures .....	194
<b>9.3.8</b> Status of the Dose-Response Relationship in Epidemiologic Data .....	195
<b>9.3.8.1</b> Hormesis .....	195
<b>9.3.8.2</b> Linearity and Dose Thresholds .....	196
<b>9.4</b> Summary .....	197
<b>9.5</b> Research Needs .....	200
<b>10. Adaptive Responses</b> .....	202
<b>10.1</b> Types of Adaptive Responses and Their Dose- Response Relationships .....	202
<b>10.2</b> Implications for the Linear-Nonthreshold Model ....	205
<b>11. Research Needs</b> .....	206
<b>12. Discussion and Conclusions</b> .....	208
<b>References</b> .....	212
<b>The NCRP</b> .....	264
<b>NCRP Publications</b> .....	273
<b>Index</b> .....	283
