Preface	iii
Executive Summary	1
1. Introduction	5
1.1 Purpose and Scope	5
1.2 Organization of this Report	7
2. Objectives	9
2.1 Radiological Effluent Monitoring and Environmental Surveillance Program Objectives	10
2.1.1 Documentation of Radiation Doses	10
2.1.2 Radiation Protection of the Ecosystem	13
2.1.3 Process, Project and Material Control	14
2.1.4 Site-Specific Environmental Transport Characterization	15
2.2 Radiological Effluent Monitoring and Environmental Surveillance Program Requirements	15
2.2.1 Licensed Facilities	17
2.2.2 DOE Facilities	22
2.2.3 EPA Monitoring Requirements	23
2.2.4 Other Federal Agencies	24
2.2.5 State and Local Requirements	25
2.2.6 Other Monitoring and Surveillance Requirements	25
2.2.6.1 Unmandated Monitoring	25
2.2.6.2 Monitoring Associated with Specific Incidents	26
2.2.6.3 Transportation	27
2.3 Typical Facility Surveillance Programs	27
2.3.1 Nuclear Fuel-Cycle Facilities	28
2.3.1.1 Uranium Recovery Facilities	28
2.3.1.2 Conversion Plants	33
2.3.1.3 Enrichment Facilities	33
2.3.1.4 Fuel Fabrication Facilities	34
2.3.1.5 Commercial Nuclear Power Plants ..	35
2.3.2 Radioactive Waste Storage and Disposal Facilities	36

2.3.3	Government Research Laboratories and Weapons Facilities	37
2.3.4	DOD Sites	37
2.3.5	Remediation Sites	38
2.3.6	Other Facilities	38
2.3.6.1	Academic Institutions	39
2.3.6.2	Medical Facilities	40
2.3.7	Radiation- and Radionuclide-Producing Machines	41
2.3.7.1	Medical Facilities	41
2.3.7.2	Accelerators	41
2.3.8	Large Radionuclide Source Facilities	42
2.3.9	Water and Wastewater Treatment Facilities	42
2.3.10	Nonuranium Mines and Oil and Gas Production Facilities	43
2.3.11	Landfills and Miscellaneous Sites	44
2.3.12	Indoor Radon	44
2.4	Systems and Applications of Radiological Effluent Monitoring and Environmental Surveillance Programs	45
2.4.1	Preoperational Environmental Surveillance	45
2.4.2	Operating Facilities	49
2.4.3	Inactive Sites	49
2.4.4	Planned One-Time or Sporadic Incidents	50
2.4.5	Incidents or Accidents During the Operating Life of the Facility	50
2.4.6	Decommissioning	52
2.4.7	Post-Closure	53
2.4.8	Regional and National Environmental Surveillance Systems	54
2.4.8.1	RadNet	54
2.4.8.2	Other Ambient Radioactivity Monitoring Networks	55
2.4.8.3	Public Involvement Monitoring Systems	55
2.4.8.4	Nuclear Test Sites	55
3.	Planning	57
3.1	Introduction	57
3.2	Step 1: State the Problem	58
3.3	Step 2: Identify the Decision	60
3.4	Step 3: Identify Inputs to the Decision	61
3.5	Step 4: Define the Study Boundaries	62
3.6	Step 5: Develop a Decision Rule	66
3.7	Step 6: Specific Limits on Decision Errors	67
3.8	Estimating Measurement Sensitivity	70
3.9	Step 8: Optimize the Design for Obtaining Data	74

4. Role of Quality Assurance/Quality Control	76
4.1 General	76
4.2 Data Life Cycle	78
4.2.1 Planning Phase	78
4.2.2 Implementation	78
4.2.3 Data Quality Assessment	79
4.2.4 Decision Making	80
4.3 Quality Assurance/Quality Control Elements	81
4.3.1 Standard Operating Procedures and Methods	81
4.3.2 Training and Qualification	81
4.3.3 Equipment and Facility Design and Fabrication	82
4.3.4 Procurement Control	83
4.3.5 Equipment Calibration and Maintenance	83
4.3.6 Operational and Performance Checks	84
4.3.7 Sample Management	84
4.3.8 Contamination Control	86
4.3.9 Inter- and Intra-laboratory Performance Evaluation	86
4.3.10 Record Keeping and Data Management	87
4.3.11 Quality Assessment for Computer Calculations	89
4.3.12 Comparison of Results with Data Quality Objectives	89
4.3.13 Assessments and Audits	89
5. Consideration of Environmental Pathways for Radionuclides	91
5.1 Introduction	91
5.2 Information Gathering	96
5.2.1 Meteorology	96
5.2.2 Geology	97
5.2.3 Subsurface Hydrology	98
5.2.4 Surface Hydrology	99
5.2.5 Demography	99
5.2.6 Radioecology	101
5.2.7 Land Use	102
5.3 Studies	103
5.4 Use of Survey and Study Data	104
5.4.1 Pathway Definition	104
5.4.2 Assessment Endpoint	105
5.4.3 Levels of Analysis	105
5.5 Data Sources for Small Facilities	106
6. Application of Prediction Models	108
6.1 Introduction	108
6.2 Source-Term Estimation	110

6.2.1	Releases to Air	110
6.2.1.1	Routine Releases	110
6.2.1.2	Accidental Releases	112
6.2.2	Releases to Surface Water	113
6.2.2.1	Routine Releases	113
6.2.2.2	Accidental Releases	115
6.2.3	Releases to Groundwater	115
6.2.3.1	Routine Releases	115
6.2.3.2	Accidental Releases	116
6.2.4	Soils	116
6.3	Fate and Transport Analysis	117
6.3.1	Atmospheric Dispersion	117
6.3.1.1	Routine Releases	118
6.3.1.2	Accidental Releases	123
6.3.2	Surface-Water Flow and Transport Analysis	125
6.3.2.1	Streams	126
6.3.2.2	Impoundments	127
6.3.2.3	Estuaries	128
6.3.3	Groundwater Flow and Transport Analysis	128
6.3.4	Multimedia Analysis	132
6.3.4.1	Intermedia Analysis	133
6.3.4.2	Multimedia Modeling	133
6.3.4.3	Food-Chain Transport	134
6.3.4.4	Human Dietary Habits, Usage Factors, Dose Factors, and Risk	137
6.4	Direct Radiation Exposure	138
6.5	Uncertainty and Sensitivity Analyses	141
6.5.1	Uncertainty Analysis	141
6.5.2	Sensitivity Analysis	144
6.5.3	Practical Applications	145
6.6	Effects of Ionizing Radiation on Ecological Endpoints	145
7.	Effluent Monitoring	147
7.1	Introduction and Scope	147
7.2	General Radiological Effluent Sampling Methods	148
7.3	Air Monitoring	149
7.3.1	Air-Sampling Considerations	149
7.3.2	Generalized Air-Sampling System	151
7.3.3	Sampling Locations	151
7.3.4	Qualifying Air-Sampling Locations	153
7.3.5	Choosing Sampling Locations	154
7.3.6	Probes	154
7.3.7	Transport Lines	160
7.3.8	Collectors	162
7.3.9	Sample and Stack Flow Measurements	165
7.3.10	System Maintenance	166

7.3.11	Accident Scenarios	166
7.4	Liquid Effluent Monitoring	168
7.4.1	Water Sampling Considerations	168
7.4.2	Water Sample Collection	169
7.4.3	Online Monitoring Systems	169
7.5	Estimating Radionuclide Releases Associated with Fugitive Emissions	170
7.6	Monitoring at Small Facilities	171
8.	Environmental Surveillance	172
8.1	Introduction	172
8.2	Sampling	173
8.2.1	Air Sampling	173
8.2.1.1	Particle Sampling	174
8.2.1.2	EPA Enhanced RadNet Air Monitoring Network	181
8.2.1.3	Monitoring Gases and Vapors	188
8.2.1.4	Radon Monitoring	190
8.2.2	Water Sampling	194
8.2.2.1	Surface Water	196
8.2.2.2	Groundwater	196
8.2.2.3	Drinking Water	199
8.2.3	Aquatic Biota	200
8.2.4	Soil Sampling	202
8.2.4.1	Surface Soil	202
8.2.4.2	Subsurface Soil	203
8.2.5	Sediment Sampling	204
8.2.6	Vegetation and Food Products	205
8.2.6.1	Milk	205
8.2.6.2	Food Products	206
8.2.7	Wildlife	206
8.2.8	Direct Radiation Monitoring	207
8.3	Analysis and Measurement	213
8.3.1	Sample Preparation	213
8.3.1.1	Air-Sampling Media	213
8.3.1.2	Water Samples	214
8.3.1.3	Solid Samples	215
8.3.1.4	Milk Samples	215
8.3.2	Analytical Methods	215
8.3.2.1	General Considerations	215
8.3.2.2	Precautions in Separations at Very- Low Concentrations	216
8.3.3	Current Radiochemical Separation Methods	216
8.3.3.1	Environmental Measurements Laboratory Procedures Manual	219

	8.3.3.2	DOE Methods for Evaluating Environmental and Waste Management Samples	219
	8.3.3.3	Standard Methods for the Examination of Water and Wastewater	219
	8.3.3.4	Annual Book of ASTM Standards	219
	8.3.3.5	EPA Procedures	219
	8.3.3.6	Multi-Agency Radiological Laboratory Analytical Protocols (MARLAP)	220
	8.3.3.7	Standardized Analytical Methods for Environmental Restoration Following Homeland Security Events	220
	8.3.4	Current Developments in Radiochemical Analysis	221
	8.3.4.1	Extraction Chromatography	221
	8.3.4.2	Inductively-Coupled Plasma-Mass Spectrometry	222
	8.3.4.3	Liquid Scintillation Alpha-Particle Spectrometry	223
	8.3.4.4	Gamma-Ray Spectrometry	224
	8.3.5	Contracted Analytical Services	224
9.		Communicating Measurement Results	226
	9.1	Introduction	226
	9.2	Data Organization	227
	9.2.1	Data Management	227
	9.2.2	Value Format	228
	9.2.3	Measurement Sensitivity	228
	9.2.4	Data Uncertainties	229
	9.2.5	Data Presentation	229
		9.2.5.1 Units	231
		9.2.5.2 Format	231
	9.2.6	Record Keeping	232
	9.2.7	Reporting	233
	9.3	Data Review and Evaluation	234
	9.3.1	Verification and Validation	235
	9.3.2	Data Quality Assessment	236
		9.3.2.1 Review the DQOs and Survey Design	236
		9.3.2.2 Conduct a Preliminary Data Review	237
		9.3.2.3 Select the Statistical Test	237
		9.3.2.4 Verify the Assumptions of the Statistical Test	238
		9.3.2.5 Draw Conclusions from the Data	238
	9.4	Assessment of Impacts	238

Appendix A. Allocation of Sampling Sites 241

Appendix B. Example Applications 244

B.1 Example 1: Offsite Doses from a University Nuclear
 Research Reactor 244

B.2 Example 2: Long-Term Stewardship of Closed
 Radiological Sites 246

Glossary 251

Acronyms and Symbols 261
