

# Contents

<b>Preface</b> .....	iii
<b>1. Executive Summary</b> .....	1
<b>1.1</b> Purpose of the Report .....	1
<b>1.2</b> The Most Important Methods to Optimize Image Quality and Minimize Radiation Dose .....	2
<b>1.3</b> Quality Assurance of Radiology in the Dental Office .....	3
<b>1.4</b> Education and Training .....	3
<b>1.5</b> Recommendations .....	3
<b>2. Introduction</b> .....	12
<b>2.1</b> Purpose .....	13
<b>2.2</b> Scope .....	13
<b>2.3</b> Radiation Protection Philosophy .....	14
<b>3. General Considerations</b> .....	18
<b>3.1</b> Doses from Oral and Maxillofacial Diagnostic Imaging ..	18
<b>3.2</b> Occupational Dose Limits .....	19
<b>3.3</b> Role of Dental Personnel in Radiation Protection .....	22
<b>3.3.1</b> The Dentist .....	22
<b>3.3.2</b> Auxiliary Personnel .....	24
<b>3.3.3</b> The Qualified Expert .....	25
<b>3.4</b> Electronic Image Data Management .....	26
<b>4. Radiation Protection in Dental Facilities</b> .....	29
<b>4.1</b> General Considerations .....	29
<b>4.1.1</b> Shielding Design .....	30
<b>4.1.2</b> Equipment Performance Evaluations and Radiation Protection Surveys .....	32
<b>4.1.3</b> Signage .....	33
<b>4.2</b> Diagnostic Reference Levels and Achievable Doses .....	33
<b>4.3</b> Optimization of Image Quality and Patient Dose: General Principles .....	36
<b>4.4</b> Protection of the Patient .....	37
<b>4.4.1</b> Selection Criteria .....	37
<b>4.4.1.1</b> Symptomatic Patients .....	38
<b>4.4.1.2</b> Asymptomatic Patients .....	38
<b>4.4.1.3</b> Administrative Radiographs .....	39
<b>4.4.2</b> X-Ray Machines .....	39
<b>4.4.3</b> Examinations and Procedures .....	39
<b>4.4.3.1</b> Intraoral Radiography .....	40
<b>4.4.3.2</b> Panoramic Radiography .....	40

	4.4.3.3	Cephalometric Radiography . . . . .	40
	4.4.3.4	Fluoroscopy . . . . .	41
	4.4.3.5	Cone-Beam Computed Tomography . .	41
	4.4.4	Image Viewing Environment . . . . .	42
	4.4.5	Use of Radiation Protective Aprons . . . . .	43
	4.4.5.1	Use of Thyroid Collars . . . . .	44
	4.4.5.2	Use of Leaded Glasses . . . . .	44
	4.4.5.3	Maintenance of Protective Aprons and Thyroid Shields . . . . .	44
	4.4.6	Special Considerations for Pediatric Imaging . . .	44
4.5		Protection of the Operator . . . . .	45
	4.5.1	Shielding Design . . . . .	45
	4.5.2	Barriers . . . . .	46
	4.5.3	Distance . . . . .	46
	4.5.4	Position of Operator . . . . .	46
	4.5.5	Personal Dosimeters . . . . .	47
4.6		Protection of Members of the Public . . . . .	49
<b>5.</b>		<b>Quality Assurance and Quality Control . . . . .</b>	<b>50</b>
	5.1	Image Quality and Patient Dose Optimization . . . . .	50
	5.1.1	Image Quality . . . . .	50
	5.1.2	Patient Dose . . . . .	52
	5.1.3	Technique Charts . . . . .	52
	5.2	Quality Control . . . . .	53
	5.2.1	Radiation Measurements of X-Ray Producing Diagnostic Dental Equipment . . . . .	54
	5.2.2	Phantoms for Quality Control and Dose Measurements . . . . .	55
	5.2.3	Quality Control for Film Imaging . . . . .	55
	5.2.4	Quality Control for Digital Imaging Receptors . .	56
	5.2.5	Quality Control for CBCT . . . . .	58
	5.2.6	Quality Control for Image Displays . . . . .	59
	5.2.7	Quality Control Tests and Frequency for Digital Radiography . . . . .	61
	5.3	Infection Control . . . . .	62
<b>6.</b>		<b>Image Receptors . . . . .</b>	<b>63</b>
	6.1	Direct Exposure X-Ray Film . . . . .	63
	6.1.1	General Information . . . . .	63
	6.1.2	Equipment and Facilities . . . . .	64
	6.1.2.1	Darkroom . . . . .	65
	6.1.2.2	Storage of Radiographic Film . . . . .	65
	6.1.2.3	Film Processors . . . . .	65
	6.2	Screen-Film Systems . . . . .	66
	6.2.1	General Information . . . . .	66
	6.2.2	Equipment and Facilities . . . . .	67

	<b>6.2.2.1</b>	Care of Screen-Film Systems for Film-Based Cephalometric and Film-Based Panoramic Imaging . . . . .	67
	<b>6.2.2.2</b>	Screen-Film Speed Recommendations . . . . .	67
<b>6.3</b>		Digital Imaging Systems . . . . .	68
	<b>6.3.1</b>	General Information . . . . .	68
	<b>6.3.1.1</b>	Proportion of Digital versus Film . . . . .	68
	<b>6.3.1.2</b>	Advantages of Digital Imaging Compared to Film Imaging . . . . .	68
	<b>6.3.1.3</b>	Potential for Dose Reductions for PSP and Digital Radiography Compared with Film . . . . .	69
	<b>6.3.1.4</b>	Disadvantages and Challenges of Digital Imaging . . . . .	70
	<b>6.3.2</b>	Equipment and Facilities . . . . .	72
	<b>6.3.2.1</b>	PSP Plates . . . . .	72
	<b>6.3.2.2</b>	Solid-State Receptors . . . . .	75
	<b>6.3.2.3</b>	Converting from Film to Digital Imaging-Potential Dose Reduction . . . . .	75
	<b>6.3.2.4</b>	Clinical Image Display Monitors for Digital Imaging . . . . .	75
<b>7.</b>		<b>Intraoral Dental Imaging</b> . . . . .	77
	<b>7.1</b>	General Considerations . . . . .	77
	<b>7.1.1</b>	Beam Energy . . . . .	77
	<b>7.1.2</b>	Position-Indicating Devices . . . . .	77
	<b>7.1.3</b>	Rectangular Collimation . . . . .	78
	<b>7.1.4</b>	Patient Restraint . . . . .	79
	<b>7.1.5</b>	Diagnostic Reference Levels and Achievable Doses . . . . .	82
	<b>7.1.6</b>	Best Practices . . . . .	84
	<b>7.1.7</b>	FDA Clearance of Dental Imaging Equipment . . . . .	85
	<b>7.2</b>	Conventional X-Ray Systems (permanently mounted and portable) . . . . .	85
	<b>7.2.1</b>	General Information . . . . .	85
	<b>7.2.2</b>	Equipment and Facilities . . . . .	85
	<b>7.2.2.1</b>	Protection of the Operator and Shielding . . . . .	86
	<b>7.2.2.2</b>	Tube Head Positional Stability . . . . .	86
	<b>7.2.2.3</b>	Position-Indicating Devices . . . . .	86
	<b>7.2.2.4</b>	Rectangular Collimation . . . . .	86
	<b>7.3</b>	Handheld X-Ray Systems . . . . .	86
	<b>7.3.1</b>	General Information . . . . .	86
	<b>7.3.1.1</b>	Advantages of Handheld X-Ray Units . . . . .	87
	<b>7.3.1.2</b>	Disadvantages of Handheld X-Ray Units . . . . .	88

	<b>7.3.1.3</b>	Safety Issues with Improper Handling of Handheld X-Ray Equipment . . . . .	89
	<b>7.3.1.4</b>	Exception to “Never Hold the X-Ray Unit” . . . . .	92
<b>7.3.2</b>		Equipment . . . . .	92
	<b>7.3.2.1</b>	Backscatter Shield . . . . .	93
	<b>7.3.2.2</b>	Leakage Radiation . . . . .	93
	<b>7.3.2.3</b>	Radiation Protective Equipment and Personal Radiation Monitoring . . . . .	93
	<b>7.3.2.4</b>	Appropriate Use of Handheld X-Ray Machines in Dental Offices (comparison to European recommendations) . . . . .	95
<b>7.3.3</b>		Position-Indicating Devices . . . . .	95
<b>7.3.4</b>		Rectangular Collimation . . . . .	95
<b>8.</b>		<b>Extraoral Dental Imaging</b> . . . . .	96
<b>8.1</b>		Panoramic . . . . .	96
	<b>8.1.1</b>	General Information . . . . .	96
		<b>8.1.1.1</b> DRLs and ADs . . . . .	96
		<b>8.1.1.2</b> Bitewings Obtained by Using Digital Panoramic Machines . . . . .	96
	<b>8.1.2</b>	Equipment and Facilities . . . . .	97
<b>8.2</b>		Cephalometric . . . . .	98
	<b>8.2.1</b>	General Information . . . . .	98
	<b>8.2.2</b>	Equipment and Facilities . . . . .	99
<b>9.</b>		<b>Cone-Beam Computed Tomography</b> . . . . .	100
<b>9.1</b>		General Information . . . . .	100
	<b>9.1.1</b>	Dose Comparisons for CBCT and MDCT Machines . . . . .	102
	<b>9.1.2</b>	Use of Simulated Bitewing, Panoramic and Cephalometric Views from CBCT Data . . . . .	104
	<b>9.1.3</b>	Number of CBCTs in the United States and Growth Rate . . . . .	105
	<b>9.1.4</b>	Efforts Regarding CBCT in Europe: Safety and Efficacy of a New and Emerging Dental X-Ray Modality Computed Tomography and Evidence-Based Guidelines . . . . .	106
	<b>9.1.5</b>	Patient Selection Criteria for CBCT . . . . .	106
		<b>9.1.5.1</b> Implants . . . . .	107
		<b>9.1.5.2</b> Oral and Maxillofacial Surgery . . . . .	107
		<b>9.1.5.3</b> Periodontal Indications . . . . .	108
		<b>9.1.5.4</b> Endodontic Indications . . . . .	109
		<b>9.1.5.5</b> Temporomandibular Joint Indications . . . . .	109
		<b>9.1.5.6</b> Caries Diagnosis Indications . . . . .	109

	<b>9.1.5.7</b>	Sinonasal Evaluation Indications . . .	109	
	<b>9.1.5.8</b>	Craniofacial Disorders Indications . . .	110	
	<b>9.1.5.9</b>	Orthodontics . . . . .	110	
	<b>9.1.5.10</b>	Obstructive Sleep Apnea . . . . .	111	
<b>9.2</b>		Equipment and Facilities . . . . .	111	
	<b>9.2.1</b>	Radiation Dose Structured Reports for CBCT (comparable to that for MDCT) . . . . .	112	
	<b>9.2.2</b>	Advantages of Pulsed Systems Over Continuous Radiation Exposure Systems . . . . .	113	
	<b>9.2.3</b>	Advantages of 180 Degree Scan versus 360 Degree Scan . . . . .	114	
	<b>9.2.4</b>	Location of Equipment and Requirements for Shielding . . . . .	114	
<b>10.</b>		<b>Administration and Education . . . . .</b>	<b>115</b>	
	<b>10.1</b>	Administrative and Regulatory Considerations . . . . .	115	
		<b>10.1.1</b> Compliance with FDA Medical Device Regulations and Electronic Product Radiation Control Performance Standards . . . . .	115	
		<b>10.1.2</b> General Considerations . . . . .	116	
		<b>10.1.3</b> Handheld X-Ray Devices . . . . .	117	
		<b>10.1.4</b> CBCT Units . . . . .	117	
		<b>10.1.5</b> Advanced Diagnostic Imaging Accreditation . . .	118	
	<b>10.2</b>	Education and Training . . . . .	119	
		<b>10.2.1</b> Digital Imaging . . . . .	120	
		<b>10.2.2</b> Handheld Imaging Systems . . . . .	121	
			<b>10.2.2.1</b> Practitioner-Additional Safety Concerns . . . . .	121
			<b>10.2.2.2</b> Operator Training . . . . .	121
			<b>10.2.2.3</b> Qualified Expert-Required Information . . . . .	121
		<b>10.2.3</b> CBCT Imaging Systems . . . . .	121	
			<b>10.2.3.1</b> Training for Practitioners . . . . .	122
			<b>10.2.3.2</b> Training for Operators . . . . .	122
			<b>10.2.3.3</b> Training for Qualified Experts . . . . .	123
			<b>10.2.3.4</b> Continuing Education for Practitioners, Operators, and Qualified Experts . . .	123
<b>11.</b>		<b>Summary and Conclusions . . . . .</b>	<b>124</b>	
		<b>Appendix A. Dental X-Ray Evaluation by Qualified Expert</b>	<b>126</b>	
	<b>A.1</b>	Radiation Safety . . . . .	126	
	<b>A.2</b>	Evaluation of the Image Receptor and Dose . . . . .	127	
	<b>A.3</b>	Film-Processing Conditions and Quality . . . . .	127	
	<b>A.4</b>	Evaluation of the X-Ray Generator and Output . . . . .	127	
	<b>A.5</b>	Evaluation of the Beam Collimation . . . . .	128	
	<b>A.6</b>	Occupational Radiation Dose Assessment . . . . .	129	

<b>Appendix B. Shielding Design for Dental Facilities</b> . . . . .	130
<b>B.1</b> General Shielding Principles . . . . .	131
<b>B.2</b> Shielding for Primary and Secondary Radiation . . . . .	133
<b>B.3</b> Shielding Principles . . . . .	134
<b>B.4</b> Occupancy Factors, Use Factors, and Workloads . . . . .	134
<b>B.4.1</b> Occupancy Factors . . . . .	134
<b>B.4.2</b> Use Factors . . . . .	135
<b>B.4.3</b> Workloads . . . . .	135
<b>B.5</b> Summary . . . . .	135
<b>Appendix C. Dosimetry, Intraoral and Panoramic Imaging</b> . . . . .	137
<b>C.1</b> Patient Dosimetry . . . . .	137
<b>C.2</b> Operator Dosimetry . . . . .	141
<b>Appendix D. Quality Control for Film Processing</b> . . . . .	142
<b>D.1</b> Five Basic Rules for Film Processing . . . . .	142
<b>D.2</b> Quality Control . . . . .	143
<b>D.2.1</b> Sensitometry and Densitometry . . . . .	143
<b>D.2.2</b> Dental Radiographic Quality Control . . . . .	143
<b>D.2.2.1</b> Dental Radiographic Quality Control Device . . . . .	143
<b>D.2.2.2</b> Aluminum Step Wedge . . . . .	144
<b>D.2.2.3</b> Lead Foil Step Wedge . . . . .	144
<b>D.2.2.4</b> Reference Film . . . . .	144
<b>Appendix E. Quality Control for Digital Imaging Systems</b> . . . . .	145
<b>E.1</b> The Display . . . . .	145
<b>E.2</b> Quality Control Phantoms . . . . .	146
<b>E.3</b> Baseline Dose Assessment . . . . .	146
<b>E.4</b> Baseline Image . . . . .	146
<b>E.5</b> Follow-Up Images . . . . .	146
<b>E.6</b> Recordkeeping . . . . .	147
<b>Appendix F. Historical Aspects of Digital Imaging</b> . . . . .	148
<b>Appendix G. Dosimetry for Dental Cone-Beam Computed Tomography Imaging</b> . . . . .	151
<b>Appendix H. Dosimetry for Multidetector-Multislice Imaging of Dentomaxillofacial Areas</b> . . . . .	165
<b>Abbreviations, Acronyms and Symbols</b> . . . . .	167
<b>Glossary</b> . . . . .	168
<b>References</b> . . . . .	179
<b>Scientific Committee and Staff</b> . . . . .	201
<b>The NCRP</b> . . . . .	208
<b>NCRP Publications</b> . . . . .	219
