

Contents

Preface	iii
1. Executive Summary	1
2. Introduction	4
2.1 Scope	6
2.2 Report Goals	8
2.3 Framework	10
2.4 Emergency Workers	10
3. Dosimetry Needs and Key Concepts	12
3.1 Introduction	13
3.2 What is Dosimetry?	16
3.3 Dosimetry Programs	17
3.4 Dose of Record	20
3.5 Key Concepts	21
4. Methods of Dose Determination and Estimation:	
Operational	23
4.1 Framework and Situational Description	23
4.2 Measurements with Limited Resources	26
4.3 Categories of Radiation Equipment	26
4.3.1 Instrument Types	28
4.3.2 Instrument Radiological Quantities	28
4.3.3 Applicable ANSI Standards	34
4.3.4 Operational Ranges of Existing Equipment	37
4.4 Mission Applicability	38
4.4.1 Handheld Survey Meter	43
4.4.2 Aerial Measurements	44
4.4.3 Large Mobile and Transportable Radiation Detectors	44
4.4.4 Radiation Portal Monitors and Fixed Detector Networks	45
4.5 Data Aggregation	45
5. Recording, Tracking and Communicating Dosimetry	
Results	47
5.1 Emergency Worker Dosimetry Recordkeeping	47
5.2 Dose Tracking and Communication with the Incident Command System	52
5.3 Communicating Radiation Dose	56
5.3.1 Communicating Dose to Emergency Workers	57

5.3.2	Additional Audiences	58
5.3.3	Challenges in Communicating Radiation Dose ..	59
6.	Recommendations for Response Organization's Radiological Capability	62
6.1	Objective	62
6.2	Capability Recommendations	63
6.2.1	Basic Level Capability	64
6.2.2	Intermediate Level Capability	66
6.2.3	Advanced Level Capability	67
6.3	On-Scene Functional Capability	68
7.	Status of Emergency Workers with Regulations and Guidance	71
7.1	NRC Regulations	71
7.2	DOE Regulations	72
7.3	OSHA Regulations	74
7.4	EPA Regulations	78
7.5	PAG Manual	78
7.6	IAEA Guidance	79
7.7	Health Insurance Portability and Accountability Act and Emergency Worker Dosimetry	80
8.	Data Needs for Dose Reconstruction	81
8.1	Dose Reconstruction	81
8.2	Fundamental Elements	83
8.2.1	Source Term	83
8.2.2	Environmental Transport	85
8.2.3	Receptor Definition	86
8.2.4	Exposure Scenario	86
8.2.5	Calculation of Dose	88
8.3	Key Issues	89
8.3.1	Dose Endpoint Identification	89
8.3.2	Model Domain	91
8.3.3	Data Sources	92
8.3.4	Uncertainty	95
8.3.5	Lessons from Previous Dose Reconstructions ...	97
9.	Conclusion	99
	Appendix A. Units Conversion Table	102
	Appendix B. Excerpts from Previous NCRP Publications ..	104
B.1	Report No. 138 (NCRP, 2001)	104
B.2	Commentary No. 19 (NCRP, 2005)	104
B.3	Report No. 165 (NCRP, 2010)	105

Appendix C. Biodosimetry	107
Appendix D. Example of a Robust Emergency Response	
Dosimetry Program	111
D.1 Equipment	111
D.1.1 Dosimeter Kit	111
D.1.2 Dose Assessment Kit	112
D.1.3 Surrogate Control Passive Dosimeter Kit	112
D.2 Personnel and Procedures	112
D.2.1 First Responding Personnel	112
D.2.2 Dose Assessment Unit	112
D.3 Challenges of a Robust Dosimetry Program	115
D.4 Contingencies Jurisdictions	115
Appendix E. Placing Doses in Perspective	116
Abbreviations and Acronyms	118
Glossary	119
References	129
Scientific Committee and Staff	139
The NCRP	147
NCRP Publications	158
