

# Contents

<b>Preface</b> .....	iii
<b>1. Executive Summary</b> .....	1
<b>1.1</b> Specific Questions Addressed .....	2
<b>1.2</b> Priority Recommendations .....	7
<b>2. Introduction</b> .....	10
<b>3. Background</b> .....	14
<b>3.1</b> Long-Duration, High Absorbed-Dose Radiation Exposure Missions .....	14
<b>3.1.1</b> Exploration Mission Profile Summary .....	14
<b>3.1.2</b> Radiation Exposure Estimates for Exploration Missions .....	15
<b>3.2</b> Current NASA Radiation Protection Policy .....	18
<b>3.2.1</b> Health Risks Associated with Space Radiation Exposure .....	18
<b>3.2.2</b> NASA Human Health and Performance Standards for Radiation Protection .....	18
<b>3.3</b> Characteristics of Radiation in Space .....	23
<b>3.4</b> Phase 1 Commentary Recommendations .....	27
<b>3.5</b> Possible Central Nervous System Effects of Space Radiation Exposure .....	32
<b>4. Observations of Humans</b> .....	34
<b>4.1</b> Side Effects of Medical Exposures .....	34
<b>4.1.1</b> Juvenile Exposures .....	35
<b>4.1.2</b> Adult Exposures .....	39
<b>4.1.2.1</b> Whole-Brain and Prophylactic Cranial Irradiation .....	40
<b>4.1.2.2</b> Prophylactic Cranial Irradiation .....	41
<b>4.1.2.3</b> Hippocampal Sparing Radiotherapy .....	41
<b>4.1.2.4</b> Stereotactic Radiosurgery .....	42
<b>4.1.2.5</b> Radiation Treatments in Head and Neck Cancers .....	42
<b>4.1.3</b> Exposure to Protons and Heavier Ions .....	43
<b>4.1.4</b> Exposure to Neutrons .....	47
<b>4.1.5</b> Summary of Application of Information from Medical Exposures to Astronauts' Space Exposures .....	47

4.2	Health Risks Following Chronic Occupational Exposure to Brain Tissue from High-LET Radiation . . . . .	48
4.2.1	Internally Deposited Radionuclides . . . . .	48
4.2.2	Other Populations that May Provide Useful Information . . . . .	49
4.3	Interaction and Potentially Synergistic Effects of Cosmic Radiation with Other Neurobehavioral and Physiological Stressors in Space Flight . . . . .	49
4.3.1	Other Stressors in Space Flight . . . . .	50
4.3.1.1	Stress, Memory and Hippocampus . . . . .	51
4.3.1.2	Stress, Negative Affect, and Right Prefrontal Cortex . . . . .	51
4.3.1.3	Stress from Social Isolation, Confinement, and Crowding . . . . .	52
4.3.2	Circadian Biology and Cosmic Radiation . . . . .	52
4.3.3	Sleep Duration, Sleep Quality, Stress, and Physical Exhaustion in Space Flight . . . . .	54
4.3.4	Cumulative Neurobehavioral Deficits from Chronic Sleep Restriction . . . . .	56
4.3.5	Biomarkers for Phenotypic Differential Vulnerability to Space Flight Stressors . . . . .	57
4.3.6	Immune and Inflammatory Responses to Sleep Deprivation and Confinement . . . . .	57
4.3.7	Sleep Deprivation and the Effects of Cosmic Radiation . . . . .	59
4.3.8	Carbon Dioxide Effects . . . . .	59
4.3.9	SPACECOT Study: Head-Down Tilt Plus CO <sub>2</sub> . . . . .	60
4.4	Future Direction and Recommendations . . . . .	61
5.	<b>Observations with Rodents</b> . . . . .	63
5.1	Experimental Considerations . . . . .	63
5.1.1	Inbred and Outbred Animals . . . . .	63
5.1.2	Mutants . . . . .	67
5.1.3	Sex Differences . . . . .	67
5.1.4	Simulated Space Radiation Facilities . . . . .	68
5.2	Descriptions of Behavioral and Cognitive Endpoints . . . . .	70
5.2.1	Sensorimotor Function . . . . .	74
5.2.2	Circadian Activity Levels in the Home Cage . . . . .	74
5.2.3	Exploratory Behavior in a Novel Environment and Measures of Activity and Anxiety . . . . .	74
5.2.4	Depression Tests; Forced-Swim and Tail-Suspension Tests . . . . .	77
5.2.5	Emotional Learning and Memory; Passive Avoidance, Contextual and Cued-Fear Learning and Memory, and Fear Potentiated Startle . . . . .	77
5.2.6	Object Recognition . . . . .	80

5.2.7	Spatial Learning and Memory Involving Navigation; Y Maze, Water Maze, and Barnes Maze .....	85
5.2.8	Social Behavior and Recognition .....	89
5.2.9	Executive Function .....	89
5.2.10	Operant Responding and Conditioned Taste Aversion .....	91
5.3	Magnitude of Behavioral and Cognitive Effects as a Function of Endpoint and Radiation Quality .....	93
5.4	Development of Biomarkers and Bioindicators of Detrimental Behavioral and Cognitive Outcomes in Animals that Will Also be Applicable to and Usable in Humans/Astronauts .....	94
5.5	Future Directions and Recommendations .....	97
<b>6.</b>	<b>Observations Relevant to Potential Mechanisms .....</b>	<b>99</b>
6.1	Cellular Mechanisms .....	99
6.1.1	Loss of Progenitor Cell Populations .....	101
6.1.1.1	Adult Neurogenesis .....	101
6.1.1.2	Oligodendrogenesis .....	106
6.1.1.3	Other Cell Populations .....	106
6.1.2	Neuronal Structural Effects .....	107
6.1.2.1	Effects on Neurites .....	108
6.1.2.2	Effects on Synapses and Dendritic Spines .....	109
6.1.3	Vascular Effects .....	111
6.2	Molecular Mechanisms .....	112
6.2.1	DNA Damage .....	112
6.2.2	Neuroinflammation and Peripheral Immune Responses .....	113
6.2.3	Oxidative Stress .....	115
6.2.4	Synaptic Signaling and Neurotransmitter Systems .....	118
6.3	Brain Imaging .....	122
6.4	Use of Unbiased Approaches and Large Data Sets, Including 'Omics, to Assess Pathways Involved in Effects of Radiation on the Brain .....	123
6.5	The Gut Microbiome, CNS Function, and Space Radiation .....	130
6.6	Future Directions and Recommendations .....	131
<b>7.</b>	<b>Applications of Models for Biological Effects of Radiation .....</b>	<b>133</b>
7.1	Applicability of Adverse Outcome Pathway Approach ..	133
7.1.1	Definition/Framework of AOP .....	133
7.1.2	Comparison with Chemical Toxicity .....	138

7.1.3	Summary	141
7.2	Risk Models and Methods for Characterizing Magnitude of Exposure in Order to Predict CNS Effects in Humans	142
7.2.1	Background	142
7.2.2	General Requirements for a Quantitative Risk Model	143
7.2.2.1	Specification of Radiation Exposure	144
7.2.2.2	Data Available for Risk Model for CNS Effects of Space Radiation	146
7.2.3	Approaching Modeling from the Adverse Outcome	150
7.2.4	Integration of Data Across All Biological Scales	152
7.2.5	Conclusion	153
7.3	Recommendations	154
8.	<b>Extrapolations Among Species</b>	156
8.1	Nonhuman Primate Considerations	157
8.2	Radiation Effects and Central Nervous System Biology	
Endpoints/Outcome Measures	158	
8.2.1	Model Development	158
8.2.2	Biomarker Analysis	159
8.2.3	Additional Important Experimental Considerations	160
8.3	Statistical Considerations	160
8.4	Recommendations	164
9.	<b>Potential Countermeasures</b>	165
9.1	Acute Effects	165
9.1.1	Shielding	165
9.1.1.1	Solar Energetic Particles	165
9.1.1.2	Galactic Cosmic Radiation	167
9.1.2	Nutrition, Dietary Supplements, and Exercise	168
9.1.2.1	Introduction	168
9.1.2.2	Nutrition	169
9.1.2.3	Dietary Supplementation	170
9.1.2.4	Antioxidant Agents	171
9.1.2.5	Exercise	172
9.1.3	Pharmacotherapeutics	173
9.1.3.1	Pharmacological Countermeasures for Space Missions	173
9.1.3.2	Pharmacokinetics and Pharmacodynamics of Drugs	174
9.1.3.3	Effects of Space Flight on Drug Disposition	175

9.1.3.4	Effects of Space Radiation and Space Flight on Drug Disposition . . . . .	177
9.1.3.5	Pharmacologic Countermeasures Specific for Space Radiation . . . . .	179
9.2	Delayed Effects . . . . .	184
9.2.1	Impact of Habitat and Vehicle Design on Late Risks to the CNS . . . . .	184
9.2.2	Shielding . . . . .	185
9.2.3	Pharmacotherapeutics . . . . .	185
9.2.3.1	Pharmacologic Countermeasures for the Delayed Effects of Space Radiation . . . . .	185
9.2.3.2	Pharmacologic Countermeasures in the Face of Permanent Radiation-Induced Effects . . . . .	186
9.2.3.3	Future Directions and Approaches for Pharmacologic Countermeasures . . . . .	187
10.	<b>Managing Risk</b> . . . . .	190
10.1	How Should “Significant Impairment” be Defined? . . . . .	190
10.2	How Can Existing Empirical Findings be Best Utilized? . . . . .	191
10.2.1	Introduction to the Cynefin Framework . . . . .	192
10.2.2	The Cynefin Framework’s Implication to Risk Management . . . . .	194
10.2.3	Design of Mission Hardware and Procedures to Minimize Impact on Missions . . . . .	198
10.2.4	Development . . . . .	199
10.3	Ethanol as a Model for Radiation-Induced CNS Impairment . . . . .	200
10.4	Recommendations . . . . .	201
11.	<b>Conclusions and Recommendations</b> . . . . .	202
11.1	Conclusions . . . . .	202
11.2	Recommendations . . . . .	208
11.2.1	Experimental Studies . . . . .	209
11.2.2	Modeling . . . . .	211
11.2.3	Data Mining . . . . .	211
	<b>Abbreviations, Acronyms and Symbols</b> . . . . .	213
	<b>Glossary</b> . . . . .	216
	<b>References</b> . . . . .	220
	<b>Scientific Committee</b> . . . . .	277
	<b>The NCRP</b> . . . . .	285
	<b>NCRP Publications</b> . . . . .	296
