Preface

This Report has been prepared at the request of the National Aeronautics and Space Administration (NASA). It is the second phase of a two-phase effort intended to provide guidance to NASA concerning the health effects and mission impacts of space radiation exposure on the central nervous system (CNS) of crew members. The first phase of effort resulted in the National Council on Radiation Protection and Measurements (NCRP) Commentary No. 25, Potential for Central Nervous System Effects from Radiation Exposure During Space Activities. Phase I: Overview, which described the critical issues surrounding the potential short- and long-term consequences of space radiation on the CNS and laid the groundwork for a more comprehensive investigation that is the basis of this Report. This Report summarizes the steps and approaches needed to more fully understand the risk of CNS effects following radiation exposures in space and provides guidance for radiation protection, including risk management. NCRP has identified knowledge gaps regarding the implementation of a comprehensive and effective radiation safety program to protect astronauts against the potential for early and late CNS effects from space radiation.

This Report was prepared by Scientific Committee 1-24P2 on Radiation Exposures in Space and the Potential for Central Nervous System Effects (Phase II). Serving on Scientific Committee 1-24P2 were:

Leslie A. Braby, Chair
Texas A&M University
College Station, Texas

Jacob Raber, Vice Chair
Oregon Health and Science University
Portland, Oregon

Members

Polly Y. Chang
SRI International
Menlo Park, California

David F. Dinges
University of Pennsylvania
Philadelphia, Pennsylvania

Dudley T. Goodhead
Medical Research Council
Harwell, United Kingdom

David Herr
U.S. Environmental Protection Agency
Durham, North Carolina

John W. Hopewell
Oxford University
Oxford, United Kingdom

Janice L. Huff
MEI Technologies, Inc.
Houston, Texas
The Council expresses appreciation to the Committee members for the time and effort devoted to the preparation of this Report, and to NASA (Grant No. NNX16AG04G) for financial support. NCRP could not continue to address the radiation protection needs of the nation without the willingness of Council members to serve, review and advise and without the partnership of agencies to work together for the good of the people and the well-being of the nation.

John D. Boice, Jr.  
President (2012 – 2018)

Kathryn D. Held  
President (2019)

*The NASA observer was involved only to provide relevant information when requested by the Committee and did not participate in development or review of the conclusions and recommendations.
